

Gaëtan FRANÇOIS

Product Manager - Enterprise Platform Delivery

Profile

I was Product Manager at WallOfTraders.com, a B2C trading platform. I owned the roadmap, decided what shipped, specified it, and validated every feature against how users actually behaved. Around that, I spent 15 years on enterprise platforms, ten of them between L'Oréal's HR business teams and the developers building for them. I wrote the functional specifications, arbitrated scope, ran the data migrations, and stayed with each release through go-live and third-line support. More recently I have gone back to building products directly: I specify, build and ship my own AI tools solo, end to end. I trained as an engineer, hold a Master's degree in Applied Mathematics, and use Claude Code daily, comfortable enough with SQL and C++ to talk to engineers without a translator.

Experience

2026

Lifaia.com
ArchitectelA
Solo Builder - Remote

Independent Product Builder - AI Tools, Built Solo End to End

- Specified, built and shipped **Lifaia.com**, an AI personal health assistant: symptom triage, medication and vaccine reminders, personalised health information
- Specified, built and shipped **ArchitectelA (archikk.com)**, three AI tools for French architects: site-visit reports, DTU-compliant technical specifications, and PLU (local planning code) compliance checks
- Owned each product alone from spec to production, coding daily with Claude Code: front-end build, deployment and iteration based on real usage

2018 - 2026

WallOfTraders.com
Remote

Product Manager - B2B/B2C SaaS Startup

- Owned the product of a trading platform end to end: decided what shipped, specified it, tested it, and validated each feature against how users actually behaved and against adoption/retention KPIs, evolving the roadmap to fit specific account needs
- Managed B2B relationships with trader accounts (demos, onboarding onto the marketplace) alongside the B2C clients who copied them, running a continuous feedback loop (Telegram, newsletters) that turned recurring friction into product changes
- Handled acquisition and its measurement (SEO semantic clustering, paid social campaigns); recruited and managed interns and apprentices

2018 - 2025

L'ORÉAL
Freelance - Remote

Senior Consultant - SaaS Integration & Adoption, Global

- Owned the integration journey for SAP SuccessFactors Employee Central (**OneProfile**) across 40+ countries: rollout plan, key-user training, milestone tracking and post-deployment support
- Sat between HR business teams and developers: gathered requirements, wrote the functional specifications, arbitrated scope, and followed each change through to production
- Integrated a time and attendance SaaS platform (Tamigo) into retail store operations worldwide: connected it to the systems already in place, then ran acceptance testing, go-live and support
- Ran L1/L2/L3 support for 40+ countries in English and French; traced recurring defects to root cause and handled the escalations that reached executive sponsors
- Managed the data migration and production rollout for **OnePayroll**, the global payroll centralisation programme, from source data mapping through to go-live

2016 - 2018

Personal Projects
R&D

AI, Machine Learning & Robotics

- Completed Coursera training in Python, Machine Learning and Deep Learning; built scrapers and applied the models to financial prediction
- Designed an autonomous drone (Pixhawk, Mission Planner, electronics)

2012 - 2016

ALTI - TCS
Paris

Techno-Functional Consultant - Enterprise Accounts

- L'Oréal** (2014-2016): ran SAP HR managed services across 40 countries (L1/L2/L3, English and French); won the competitive outsourcing tender; wrote the transfer documentation and managed the offshore delivery team in India
- FMC Technologies** (2013): deployed SAP HR across 8 European countries; business blueprint, personnel and organisational structure, data migration
- Further clients: Air France, Generali, Sanofi, Canal+, Degremont, Cofely-Ineo

2010 - 2012

eFront, Enablon
Stago
Paris

Software Support, Configuration & Development

- Supported, maintained and configured finance and quality management software; built a 3D factory simulation in C++ and OpenGL during an engineering placement at Diagnostica-Stago

Education

ESILV

Master's degree in Engineering - Applied Mathematics, 2010
Léonard de Vinci - Courbevoie La Défense, France

Konkuk University

Exchange semester - Science courses in English, 2008
Seoul, South Korea

CPGE Pasteur

Preparatory Classes MPSI - Mathematics, Physics, Engineering
Neuilly-sur-Seine, France
