Daily reading

Profile

At WallOfTraders.com, a B2C trading platform, I was Product Manager and owned UX: roadmap, wireframes and specifications. Trained as an engineer, I also spent 15 years in enterprise software, including ten years bridging L'Oréal's HR teams and their developers, and I use Claude Code daily alongside web technologies.

Experience

2026

Lifaia.com
ArchiKK.com
Personal projects - Remote

Solo founder - Products vibe-coded with Claude Code

- Designed and built solo Lifaia.com (a personal health assistant) and ArchiKK.com (AI tools for architects), from wireframe to live product, using Claude Code to accelerate implementation

2018 - 2026

WallOfTraders.com
Remote

Product Manager & UX lead - B2B/B2C SaaS startup

- Owned product and UX end to end on a trading platform: wireframes, user journeys, and functional specification of every feature, guided by adoption and retention KPIs and evolved to fit specific account needs
- Ran a continuous feedback loop across two segments, B2B trader accounts (demos, onboarding onto the marketplace) and B2C clients who copied them (Telegram, newsletters): informal user testing and usability iterations driven by the friction they reported
- Kept the platform's visual and interface consistency as it evolved, overseeing the interns who handled part of the execution
- Also owned acquisition and its measurement (SEO, semantic content clusters, paid social campaigns)

2018 - 2025

L'ORÉAL
Freelance - Remote

Senior consultant - SaaS rollout & adoption, global scope

- Owned the rollout of SAP SuccessFactors Employee Central (**OneProfile**) across 40+ countries: deployment planning, key-user training, milestone tracking and post-go-live support
- Acted as the interface between HR business teams and developers: gathering requirements, writing functional specifications, arbitrating scope and following each change through to production
- Rolled out a SaaS time-management solution (Tamigo) into store operations worldwide: testing, go-live and support
- L1/L2/L3 support across 40+ countries in English and French; traced recurring issues to their root cause and handled escalations

2016 - 2018

Personal projects
R&D

AI, machine learning & robotics

- Coursera training in Python, machine learning and deep learning; built scrapers and applied models to financial prediction
- Designed an autonomous drone (Pixhawk, Mission Planner, electronics)

2012 - 2016

ALTI - TCS
Paris

Functional & technical consultant - Major accounts

- L'Oréal** (2014-2016): SAP HR application maintenance across 40 countries (L1/L2/L3, English and French); won a managed-services tender; wrote transition documentation and led the delivery team in India
- FMC Technologies** (2013): SAP HR rollout across 8 European countries; business blueprint, administrative and organisational structures, data migration
- Other clients: Air France, Generali, Sanofi, Canal+, Degremont, Cofely-Ineo

2010 - 2012

eFront, Enablon
Stago
Paris

Support, configuration & software development

- Support, maintenance and configuration of financial and quality management software; 3D factory simulation in C++ and OpenGL during an engineering internship at Diagnostica-Stago

Education

ESILV

Engineering degree - Applied Mathematics, 2010
Léonard de Vinci - Courbevoie La Défense, France

Konkuk University

Exchange semester - science courses in English, 2008
Seoul, South Korea

CPGE Pasteur

Preparatory classes (MPSI) - mathematics, physics, engineering sciences
Neuilly-sur-Seine, France
