Senior Project Manager - International Software Programmes & Data Migration

Profile

Senior project manager with 15 years' experience delivering software programmes for large international organisations, including a 10-year engagement with L'Oréal worldwide (40+ countries). I planned and tracked the SAP HR to SAP SuccessFactors migration and the global payroll centralisation, from data migration and user acceptance testing to go-live, working daily with business teams and developers. I wrote the functional specifications developers built from, and managed an offshore delivery team in India after winning the outsourcing tender. Hands-on technical background (C++, Python, SQL). Product Manager at WallOfTraders.com, a B2B/B2C SaaS startup, where I worked with the technical team on every release. Master's degree in Applied Mathematics.
